

**DIMENSIONS (mm)**

- \* Special designed for oven and grill or other kitch appliances.
- \* Low noise, high torque, low operating temperature
- \* Nickel Steel Gears and Medium Carbon Steel Gears

**OTHER OPTION**

| SPECIFICATIONS                                    |                  |           |    |     |     |
|---|------------------|-----------|----|-----|-----|
| RATED VOLTAGE                                     | VAC              | 220 - 240 |    |     |     |
| RATED FREQUENCY                                   | HZ               | 50 OR 60  |    |     |     |
| INPUT POWER                                       | W                | 4 - 6     |    |     |     |
| INPUT CURRENT                                     | mA               | 35        |    |     |     |
| OUTPUT SPEED (AT 50HZ)                            | RPM              | 1.5       | 2  | 2.3 | 2.5 |
| OUTPUT TORQUE (AT 50HZ)                           | Kgf.cm           | 16        | 14 | 12  | 11  |
| NOISE   | DB(A)            | 45        |    |     |     |
| INSULATION RESISTANCE                             | m                | > 100     |    |     |     |
| INSULATION CLASS                                  | E                |           |    |     |     |
| DIELECTRIC STRENGTH                               | AC1500V 50Hz/min |           |    |     |     |
| ROTATION DIRECTION                                | FREE             |           |    |     |     |
| OPERATION VOLTAGE CAN BE CHANGED AS USER'S DEMAND |                  |           |    |     |     |
